

BioRePeel

Skin peels are designed to transform complexion through the exfoliation and removal of dead skin cells, stimulating the growth of healthy, new cells. BioRePeel is one of the new peels on the market offering a safe and effective way for anyone who wants healthy-looking skin due to its multifunctional benefits.

What is different about BioRePeel?

Older type peels were only normally suitable for type 1 to 4 skin, but the BioRePeel is suitable for all Fitzpatrick skin types which is great news for individuals with darker skin tones.

BioRePeel can be used for the treatment of:

- ❖ Prevention of skin aging
- ❖ Prevention of fine wrinkles
- ❖ Hyperpigmentation
- ❖ Skin texture improvement
- ❖ Skin colour improvement
- ❖ Acne
- ❖ Post acne injuries
- ❖ Large pores and blackheads.

Which areas can the Peel treat?

The peel is effective on the following areas:

- ❖ Face
- ❖ Neck
- ❖ Décolleté (Chest)
- ❖ Underarms
- ❖ Elbows
- ❖ Hands
- ❖ Feet

The Skin-Rejuvenating Power of BioRePeelCI3

BioRePeel is an innovative medical peel, that provides a bio-stimulating, revitalising & peeling-like effect. It encourages cell turnover by stimulating the production of collagen, elastin and hyaluronic. The cell turnover works to remove the outer cells with a selective-action process on bonds in the corneal layer. The ingredients in BioRePeel work to induce an intense stimulation of

new skin and a biosynthetic process that is essential to countering the effects of natural aging and even damage caused by UV light.

Decreases Damage from UV Light

BioRePeel can help reduce the damage that UV light does to your skin. Not only does UV light age your skin, but it is also responsible for pigmentation, acne breakouts, age spots and wrinkles. BioRePeel gives no photosensitisation.

Prevents Aging

The skin's appearance changes as you age. Wrinkles, fine lines, and dry patches are just some of the things that can happen to your skin as it gets older. BioRePeel uses a 2-phase technology that provides a bio-stimulating revitalizing peeling effect on the surface of your skin which help to prevent the signs of aging and will keep your skin looking more youthful.

Mild Exfoliating Treatment

BioRePeel offers mild exfoliation for your skin to help prevent the signs of aging from showing up. Exfoliation is a great way to keep your skin looking healthy and vibrant. Exfoliation helps keep your skin hydrated by removing the layer of cells that can trap moisture and make your skin look dry, in addition, it removes the dullness caused by dead skin cells, helps prevent acne breakouts, and reduces the appearance of wrinkles.

What are the ingredients of BioRePeel?

The BioRePeel contains high-tech, clinical-grade ingredients, precisely blended to deliver maximum effectiveness to nourish the skin.

The main peel ingredients are:

- ❖ TCA 35%
- ❖ Lactobionic acid
- ❖ Salicylic acid
- ❖ Tartaric acid
- ❖ Citric Acid

Pre-care

- ❖ You will need to avoid the use of AHAs, BHAs and retinol products for 3 days prior to your appointment.
- ❖ No direct sun exposure for 7 days prior to your appointment.

- ❖ Avoid any form of self-tan for 7 days prior to your appointment
- ❖ Avoid any laser hair removal for 7 days.
- ❖ Avoid waxing and chemical hair removal creams for 7 days.

Treatment

Your skin will be thoroughly cleansed. The chosen peel will be applied to the specific area(s). You may get a warm tingling sensation whilst the peel is working its magic, but do not worry, your skin will be monitored during the treatment. Peel treatment will be removed, and your skin will be cleansed. Finally serum will be applied.

After Care

- ❖ Makeup products should not be applied for 24 hours after the treatment.
- ❖ It is strongly advised to apply SPF 50 daily onto your skin after.
- ❖ It is recommended continue not to use AHAs, BHAs and retinol products for a further 7 days. Applying these products too early into the healing process may inhibit the skin's natural healing abilities.
- ❖ Avoid exercise and any form of heat treatments for 48 hours.
- ❖ Avoid any laser hair removal for 14 days.
- ❖ Avoid waxing and chemical hair removal creams for 14 days.
- ❖ Avoid saunas, steam rooms, swimming, and tanning beds for 7 days.

Contra-Indications

BioRepeelCI3 may not be suitable for individuals with the following conditions:

- ❖ Diabetes
- ❖ Kidney disease
- ❖ Cancer
- ❖ Keloid scarring
- ❖ Auto immune disorders
- ❖ Pregnancy or breastfeeding

These contra-indications can be discussed with your therapist at your consultation appointment.

Recommended Treatment Course

It is recommended to have one treatment every 7-10 days for a duration of 4-6 sessions and by completing this course will give you the best results.

It is recommended to repeat the course once a year. This treatment can be completed at any point of the year.
